

Abdelaziz Abdelmonem Mohamed

Junior Penetration Tester | Ethical Hacker

Giza, Egypt | +20 102 612 3287 | abdelazizmohmed68@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

CEH, eWPTX, and eMAPT certified Junior Penetration Tester holding dual B.S. degrees in Cyber Security. Positioned as a dedicated offensive security specialist focused on web, mobile, and network penetration testing, combining rigorous exploit validation with custom tool development to eliminate enterprise attack vectors.

INTERNSHIPS

Network Security Trainee | National Telecommunication Institute (NTI)

Sep 2026 - Oct 2026

- Conducted hands-on vulnerability assessments and exploit validation across 15+ simulated enterprise network environments, identifying and prioritizing 30+ configuration weaknesses.
- Configured and tested firewall rule sets and access control policies to enforce network segmentation, restricting unauthorized traffic by 100% in test topologies.
- Performed network traffic analysis using Wireshark and Nmap on 50+ target nodes to detect anomalies, map attack surfaces, and deliver detailed remediation guidance for internal infrastructure.

Web Application Penetration Tester Trainee | Arab Open University (AOU)

Dec 2024 - May 2025

- Performed security assessments on 20+ web applications, successfully executing exploit validation and uncovering critical vulnerabilities including SQL Injection, XSS, and Broken Authentication.
- Utilized Burp Suite and advanced manual testing techniques to bypass security controls, validate findings, and ensure zero false positives.
- Collaborated with development teams to provide actionable remediation guidance and strategies based on the OWASP framework, reducing application risk scores.
- Drafted detailed technical remediation reports addressing OWASP Top 10 vulnerabilities (including SQLi, XSS, and IDOR) for development and executive teams.

PROJECTS

Egyxos - Enterprise Password Manager | Secure Local-First Desktop App

- Architected and developed a secure local-first desktop password manager using Python and CustomTkinter, achieving 100% local data protection via AES-256 (Fernet / PBKDF2HMAC) and isolated SQLite3 storage to mitigate credential compromise.
- Integrated Have I Been Pwned (HIBP) API breach checking with k-anonymity (SHA-1) and asynchronous threading, delivering real-time threat intelligence to neutralize compromised user credentials instantly.

[View on GitHub](#)

Egyxos Scanner | Automated Security Reconnaissance & Vulnerability Tool

- Architected a custom Python-based automation tool deployed across 100+ target domains to scale offensive reconnaissance, minimizing potential blind spots for security teams.
- Engineered detection modules for high-impact web flaws (SQLi, SSRF, XSS), reducing manual reconnaissance and scanning overhead by 40% to accelerate vulnerability triage and business risk mitigation.

TECHNICAL SKILLS

Primary Target Role (Junior Penetration Tester): Burp Suite, Nmap, Metasploit, SQLmap, OWASP ZAP, Nuclei, Wireshark, Manual Exploitation, Exploit Validation, Vulnerability Assessment, Threat Modeling.

Security Domains: Web Application Penetration Testing, Mobile Application Security, Network Security, OWASP Top 10, Remediation Guidance.

Programming & Tooling: Python (Security Automation, Cryptography, API Integration), Bash.

Infrastructure & Compliance: Linux (Kali), TCP/IP, Routing & Switching, Firewall Configuration, Access Control.

CERTIFICATIONS

- Certified Ethical Hacker (CEH) - EC-Council
- eLearnSecurity Web Application Penetration Tester eXtreme (eWPTX) - eLearnSecurity
- eLearnSecurity Mobile Application Penetration Tester (eMAPT) - eLearnSecurity

EDUCATION

Dual Bachelor of Science in Cyber Security — Expected 2027

The Open University - UK

Arab Open University - Egypt

LANGUAGES

Arabic: Native | English: B2 - Professional Working Proficiency
